

**MARLIN MODEL 80-C and 80-DL**  
**BOLT ACTION .22 CAL. REPEATING RIFLE**

**TO PUT TOGETHER**

Remove magazine from stock, place barrel in stock and tighten take down screw, insert magazine.

**TO TAKE APART**

Remove magazine; unscrew take down screw and separate barrel and stock.

**TO OPERATE**

Load magazine, being sure when inserting cartridges that the rims are ahead of each other so they will feed out freely. Open action, install magazine. Be sure to push magazine in until the locking latch snaps. By closing the action and bringing the handle down to its locked position a loaded cartridge is fed into the barrel. The rifle is now ready to fire upon pulling the trigger. To carry the gun loaded put "ON SAFE"

**TO REMOVE BOLT**

With breech bolt in open position, hold back on trigger and pull bolt out of action.

**TO REPLACE BOLT**

Turn front end of bolt to right as far as it will go — hold back on trigger and slide bolt into action.

**CAUTION**

DO NOT snap the Firing Pin on an empty chamber. Always be sure to clean out the bore of the barrel before shooting. A small obstruction will cause damage to the barrel. We recommend .22 Long Rifle cartridges for best results.

**SIGHT ADJUSTMENT**

Every rifle is shot at a target before leaving our factory and the sight set. Further adjustment may be made if needed. When shooting rifle, to adjust sights, use a bench rest to steady the rifle or a sand bag rest for support. If the rifle shoots to the right, move the rear sight to the left. If the rifle shoots to the left, move the rear sight to the right. Use copper hammer or brass rod to prevent damaging sights or barrel. The peep sight can be adjusted for both windage and elevation on rifles that are equipped with a receiver peep sight.

This firearm is fully guaranteed against defects in material and workmanship
